EJECTOR PINS/NEEDLES

EJECTOR Needles functions as a media to push or eject the die off the adhesive (mylar) tape during the die attach process. We recommend our polished and critically machined pins made from specially recommended materials – especially to **eliminate issues** like 'die marks' (cracks) and 'die floating'...

PLASTIC COLLETS/TIPS

PLASTIC Collets are suitable to pick up very small die with sensitive top sides (in eutectic, soft solder and epoxy die attach). They can be produced with various shapes & sizes (eg: Round, Square & Rectangle, with or without Relief or Pocket). **The temperature withstand of the materials can reach up to 400degC**
